

please don't limit satalite radio's ability to provide me with the news and information that I need to do my job. having local live traffic and related news is a big assect to me as a truck driver. mabey local residents know where to get good local news and traffic but we who travel dont and xm provides us with a good source. if xm should be limited on there ability to provide local information then local stations should be limited on there ability to provide anything of a national intrest. attempting to keep us in the past whith the technology of our grandfathers is akin to asking us to limit our use of cell phones and go back to sending our messages by postal mail.thank you
